

# BANISH™ 30

MULTI-CALIBER SUPPRESSORS

The most versatile suppressor in the Banish line, the BANISH 30 works with all of your rifle calibers from .17 to .30 caliber magnums.

All BANISH suppressors have unmatched sound suppression. Testing shows that a BANISH 30 reduces the report of a .308 by a whopping 34 dB!

Made from Titanium alloy, the BANISH 30 has unmatched durability and an extremely light weight. The BANISH 30 comes as a 9-inch suppressor holding eight STifle™ baffles, yet for tighter shooting platforms or blinds, can easily break down and assemble into a 7-inch configuration. At seven inches, you'll hardly notice the suppressor on the end of your rifle.

Perfect for the range, hunting, or any other shooting application, the Banish 30 will significantly reduce the report and recoil of large-caliber rifles, while still being effective on rifles down to rimfire calibers.
