

BANISH™ 45

MULTI-CALIBER SUPPRESSORS

This modular silencer is specifically designed for handguns. The BANISH 45 will fit calibers from .45 ACP to rimfire. Testing shows the BANISH 45 suppresses a 9mm pistol 36 decibels, far more sound reduction than the competition.

The BANISH 45 is the lightest in its class at a mere 9.6 oz in the short configuration. Ideal for 3-gun or target shooting, the BANISH 45 will help protect the hearing of the shooter and others in a shooting competition and reduce recoil for quicker second shot target acquisition.

This multi-caliber, user serviceable and modular design makes it the one to fit any handgun.
